HMO3E

The HDMI Single Extender (150M) can extend your HDMI signal by 150M. It is an HDMI hybrid that uses a single coaxial cable to become a media. This allows Easy HDMI to be installed over a long distance. The full resolution HDTV signal supports a maximum distance of 100 meters in 1080P full compatibility. The setup is simple. The system automatically adjusts, equalizes and amplifiers feedback, and the user does not need to care about the length of the cable. The device is widely used in high-definition advertising systems, conference systems, home entertainment, etc.

- 1. No need to set, plug and play;**
- 2. Support HDMI1.3, HDCP1.2;**
- 3. Support HDMI1.3 3D 1080P resolution;**
- 4. Support input and output resolution: 480i / p, 567p, 720p / 1080i / p;**
- 5. Support TCP / IP protocol, and support a multi-receive send, multi-send multi-receive.**
- 6. Supports CAT5/5E/6 standard 8-core network cable and transmits HD signal to 150m**
- 7. Built-in equalizer for long distance amplification and optimized transmission of signals**
- 8. Suitable for HDTVs and monitors with HDMI or digital interface compatible with HDCP protocol.**
- 9. It is compatible with DVI by using a DVI to HDMI adapter.**
