## **Product Introduction:**

200m HDMI KVM Extender over IP is a device based on the standard TCP/IP protocol for transmitting HD audio and video source over LAN . It transmits your HD display with the high resolutions up to 200 meters away from your HDMI or DVI-D source by using one CAT5e/6 cable. At the same time, it's also convenient to transmit HDMI audio and video source by point-to-point, multipoint-to-multipoint and cascade connection mode.

## **Features & Specifications:**

Support HDMI1.4/HDCP1.4

Support point-to-point mode, multipoint-to-multipoint mode and cascade connection mode.

Standard 802.3 Ethernet

Support one way IR extension.

Pure hardware design, plug and play, do not need to install additional software
